Google Apps

Google Apps is a set of Google's hosted messaging and collaboration solutions, to help businesses communicate and collaborate more effectively. They include Gmail (for email), Google Calendar (for diary management), Google Talk (messenger), Google Sites (collaboration web sharing and content management), Google Docs (word processing, spreadsheets and presentations). It's priced as a bundle package for businesses and is sold under the banner of the Google Apps Premium edition.

What are Google Apps?

Gmail solution for emailing giving you up to 25Gb of user mailbox space

Google Calendar allows users to organize their schedules, share their calendar and events

Google Talk for your users to send instant messages, share files and voice to their contacts.

Google Sites is a shared company web area for collaboration on documents, web content & business info.

Google Docs is a word processing, spreadsheet and presentation web based app.

The start page is a central area or dashboard for all users to navigate quickly to their apps.
