MOVING to the CLOUD
...Makes GOOD Financial Sense!

- ✓ **Cost Effective** ✓ **Secure**
- ✓ **Flexible** ✓ **Reliable**

TechQuarters are a team of Cloud Computing Consultants that help you move your IT to the Cloud and support you thereafter.

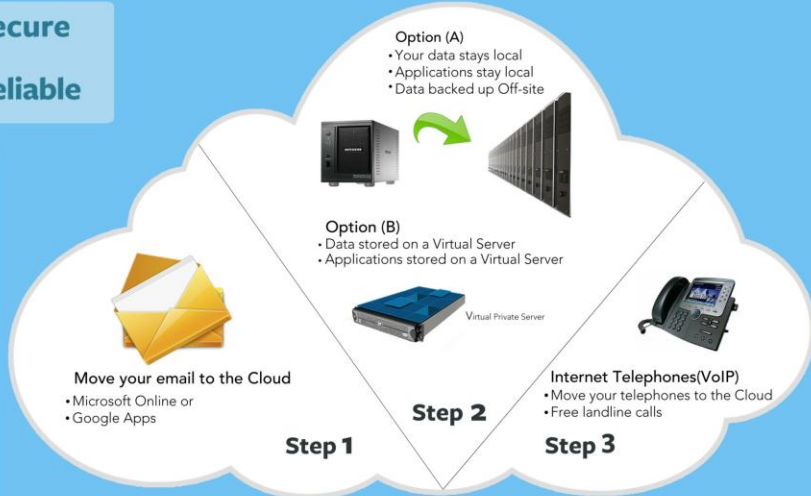

Over the past year, we have consulted with many small to medium sized businesses about moving their IT to the Cloud.

The main reason for them move to the Cloud, was because they needed to upgrade their server(s) and the Cloud was an appealing alternative to paying £1,000's for a new one.

'TechQuarters decommissioned our servers and moved us to the Microsoft Cloud. It was a pleasure working with their consultant and the support has been wonderful.'
Rob, Operations Director of The Teaching Awards

With the Cloud, you choose how much you want to move there. It's incredibly flexible and there are 3 typical steps, as shown here.
