

Microsoft Office 365

Microsoft's Office 365 is a set of Microsoft hosted messaging and collaboration solutions and it is the upgrade to their existing BPOS (Business productivity online suite). It includes Microsoft Exchange Online, Microsoft SharePoint Online, Microsoft Lync Online, Office Professional 2010 and Office Web Apps. Office 365 is priced as a bundle package or you can purchase each piece of software as a separate. Microsoft has created flexible pricing plans that you can choose from depending upon which one suits your business the best.

What can Office 365 do for you?

Microsoft Online services have been developed to make businesses more productive. It gives employees greater ability to communicate and collaborate on documents, file sharing, online meetings, project collaboration and workflow management. Essentially, it improves time management so users can get on with the more critical day to day tasks.

The services are hosted by Microsoft across in their global data centers which TechQuarters will help you migrate to and manage. Your company data is backed up across Microsoft's dedicated server infrastructure, with multiple layers of security and because it's online it's accessible from any web browser.

What are OFFICE 365 benefits?
