

MODERN WORKPLACE

WHAT IS IT?

TechQuarters Modern Workplace Solution combines the collaborative capabilities provided by Microsoft 365 with the flexibility and practicality of Microsoft Surface Devices.

Our Modern Workplace or 'business in a box' is the complete solution, providing organisations with the device, operating system, software and security.

Microsoft 365 includes: Windows 10 pro, Office 365 and Enterprise Mobility & Security (EMS).

Whilst Surface as a Service allows organisations to purchase Microsoft Surface Devices on a monthly subscription.

HOW DOES IT WORK?

Select from the suite of Surfaces, including Microsoft Surface Pro, Surface Book, Surface laptop and an array of Surface Accessories for all models.

TechQuarters will then source, deliver and set-up your devices with your Microsoft 365 package, (Windows 10 pro, Office 365 and EMS).

SaaS operates on a pay-monthly lease subscription, spreading the cost over 1-3 years and avoiding large one-off payments. Leasing Surfaces also means that organisations can easily add devices onto their subscription at a later date, keeping payments simple.

WHAT'S INCLUDED?

- **MICROSOFT 365**
 - Office 365
